

# Carbon Footprint Policy

Hannafin Contractors is committed to reducing its environmental impact wherever practicable. Carbon reduction measures form an integral part of our overall company strategy, supporting improved operational performance and the minimisation of potentially harmful emissions to land, water, and air.

Our aim is to achieve a net-zero carbon balance within a realistic and achievable timeframe. Specific target dates and reduction levels will be established following a thorough analysis of all business activities and operational practices.

To support the achievement of carbon neutrality, the Company will:

- Comply with all relevant environmental legislation, striving to meet or exceed legal and regulatory requirements.
- Minimise waste and promote recycling, including the use of recycled materials, to reduce the amount of waste sent to landfill.
- Promote sustainable sourcing wherever possible through responsible procurement practices.
- Install energy-efficient equipment throughout company premises to reduce carbon emissions.
- Assess and procure fuel-efficient vehicles and plant equipment wherever practicable to lower operational emissions.

This policy outlines Hannafin Contractors' commitment to integrating environmental considerations into all aspects of its operations, with the aim of continuously improving environmental performance and contributing to a sustainable future.
